

V-TURN Series

Vertical Turning Lathe

YCL 600 | YCL 700 | YCL 850 | YCL 1000

Shaping The Future By Shaping Metal

Cosmos is a CNC machine tool manufacturer established in 1987, focused on developing practical machining solutions for production environments. The company began with the supply of advanced vertical machining centres and later expanded into the **manufacturing of surface grinding machines, drill tap centres, vertical machining centres, vertical lathes**, and other CNC solutions.

Today, Cosmos provides machining solutions ranging from entry-level production machines to advanced technology platforms. Machine development focuses on rigidity, accuracy, and long-term stability to support consistent performance in production environments.

With manufacturing rooted in India's industrial strength and aligned with global standards, Cosmos focuses on delivering machining solutions that support long-term customer relationships. As India's manufacturing sector continues to expand, Cosmos remains focused on enabling reliable and efficient machining through practical engineering and consistent manufacturing practices. This approach is guided by the company's core values of

Integrity, Respect for Individuals, Dynamic Thinking, Creativity & Innovation, and Social Responsibility.

Cosmos Manufacturing Unit 1

Comprehensive Machining, Fabrication & Assembly Hub

This facility forms the backbone of our manufacturing excellence, producing high-performance CNC machines with industry-leading accuracy and reliability.

Manufacturing Footprint
~15 acres

Workforce
~1200
Skilled Professionals

Cosmos Manufacturing Unit 2

Heavy Machinery Manufacturing & Final Integration

This unit plays a critical role in ensuring that every Cosmos machine delivers superior performance, longevity, and precision.

Manufacturing Footprint
~2.5 acres

Upcoming Manufacturing Facility
~25 acres

Workforce
~250 Skilled
Professionals

Casting

Fabrication

Powder Coating

Machine Assembly

Sheet Metal Assembly

Electrical & Controller Assembly

Final Quality Assurance & Dispatch

YCL 600 / 700 / 850 / 1000

Backed by over 40 years, this collaboration aims to bring International technology to the Indian market by merging YOU JI expertise with Cosmos's local presence.

The YCL series features robustly designed structure. The transmission includes rigid roller guideways and C3 class precision ball screws. The extremely rigid Hydraulic Turrets provide ultimate stability to ensure heavy cutting and obtain best surface finish.

These machines deliver reliability and exceptional performance.

Key Features

Base

YCL base is specially designed to withstand heavy loads and absorb vibrations during severe machining conditions.

Robust mono-block base made of cast iron.

For efficient chip disposal of high volume of chips the base is designed with steep slope and high capacity flushing system.

Precision Spindle

YCL series spindles are built to provide unsurpassed performance in turning tough steels as well as difficult materials like Titanium, Inconel and Nickel-base and superalloys and other challenging material. Incorporated with rigid cylindrical roller bearings and angular contact ball bearings which are used to withstand higher radial and axial loads during machining, precision and performance are assured.

Strong Saddle

Robust Saddle design ensures high cutting performance and rigid mounting for the heavy duty hydraulic turret. This ensures high durability and accuracy.

Column

The column is heavily ribbed to provide a balanced strong structure for heavier cutting.

Roller Guideway along with the integrated motor mounting bracket design on saddle provides vibration free performance and ensures high precision with long life.

Key Features

Turret

- 8/12 Station Bi Direction hydraulic turret.
- Clamping, unclamping, and rotational movement operated by hydraulics.
- Tool disc is symmetrical with turret body, mostly suitable for VTL.

Effective Chip Evacuation

- The hollow-center layout and coolant-flush system facilitate natural chip flow by gravity, delivering optimized and clean chip evacuation from the machine's rear.

User-Centric Design

- The full enclosure (without the top cover) keeps the workspace safe and clean. The optional top cover can be added for CE compliance or specific machining needs.
- The swivel operation panel allows easy operation from any angle.
- The wide door makes loading and unloading workpieces easier, and the large windows provide excellent visibility.

Customized Automation Solution

- We offer customized automation solutions for production industries to help make manufacturing smoother, faster, and more reliable.
- Our systems are designed to reduce manual work, improve efficiency, and ensure a steady production flow.

Design Features

- Vertical Lathe is designed for heavy duty turning.
- The combination of robust structure and roller LM Guideways ensures the highest level of rigidity and stability for highly accurate turning.
- Hydraulic Turret with powerful spindle motor allows great cutting performance.

*Spindle maximum rpm will be limited in operation based on chuck selection.

Standard Features

- " CNC System with 10.4" colour Monitor Fanuc OiMF /Mitsubishi M80V LA/ Siemens 828D "
- Heavy-duty Roller LM Guide-ways on X & Z axes
- Precision Ballscrews directly coupled with Axes Motors
- 8/12 Station Bi-directional Hydraulic Turret
- 3 Jaw Hydraulic Chuck with 1 set Hard & Soft Jaw (metric serration)
- HI-LOW (Dual) Pressure Clamping
- Hydraulic Powerpack
- Stepdown Transformer for Fanuc/Mitsubishi
- Std Coolant system for cutting and bed flushing
- Chip Conveyor with Chip Bin
- Coolant Gun & Air Gun
- Oil Skimmer
- A. C. Unit for electrical cabinet: panel mounted type
- Automatic Centralized Oil Lubrication System
- Portable MPG
- LED Work Lamp & 3-tier Lamp
- 4 nos. of Boring Holders & 1 Facing Holders (32x32)
- Fully Enclosed M/C Guard top open
- Tool Kit
- Levelling Pad
- PCMCIA card or equivalent

Optional Features

- 2 Speed Gear Box (YCL 850 & 1000)
- Auto Door Pneumatic
- Industry 4.0 Features (Cosmos Digifac)
- Voltage stabilizer
- Additional boring tool holder with Through coolant facility
- Additional Axial tool holder
- High pressure cutting coolant
- Extra set of boring bar sleeves
- Extra set of Taper Shank Sleeves
- 30/37kw Spindle Power for 850/1000
- 22/30kw spindle power for 600/700
- Customized Automation Solution
- Linear Scale for X Axis | Z Axis or Both
- Contact Sales Team for More accessories
- Chuck upgrade to next size / 4 jaws / 6 jaws
- Proximity for chuck clamp detection

Controller Features

CNC Features	Fanuc Oi-TF Plus	Mitsubishi-M80V LA	828D Basic T (Option)
Display & Keyboard	10.4" Colour LCD	10.4" colour LCD touch	10.4" Colour TFT with full QWERTY
Max feed axes	3	3	3
Simultaneously controllable axes	3	3	3
Minimum input increment	0.001 mm	0.001 mm	0.001 mm
