Preface

A SPECIAL EDITION OF CONNECTIONS & ACHIEVEMENTS

As we celebrate **India's Independence Day**, we are pleased to bring you this Special edition of First Connect, a reflection of the connections, achievements, and meaningful moments that have shaped our journey over the past few months.

This edition brings together stories from across Cosmos that highlight what happens when **people, ideas, and purpose come together**. From strengthening our service capabilities and connecting with customers and industry, to nurturing future talent, recognising our people, and contributing towards a greener future, each story reflects our continued journey of growth and progress.

Our achievements are made meaningful by the connections behind them the teams that work together, the customers who place their trust in us, the partners who grow with us, and the communities with whom we share a larger responsibility. As we mark Independence Day, this edition reflects the **spirit that drives us forward the spirit to innovate, improve, contribute, and grow together**.

We invite you to turn the pages and revisit the moments that made this quarter meaningful the milestones we achieved, the relationships we strengthened, and the initiatives that made an impact.

**Celebrating our connections. Celebrating our achievements.
Celebrating the journey ahead.**

**Wishing everyone a very
Happy Independence Day!**

Annual Conference 2026

"When people come together with a shared purpose, growth becomes a collective journey."

Bringing together service leaders and engineers from across the country, the Annual Conference 2026 served as a platform to reflect on achievements, share learnings, and align priorities for the year ahead.

The event also recognised outstanding contributions across branches, teams, and individuals, reinforcing a culture of collaboration, performance, and continuous improvement.

ANNUAL SERVICE MEET 2026

Strengthening Our Commitment to Customer Success

Exceptional service goes beyond resolving breakdowns, it is about ensuring customers experience maximum machine uptime, reliable performance, and the confidence of having a trusted partner whenever support is needed. With this commitment at its core, the **Annual Service Meet 2026** brought together service leaders and engineers from across India to align on best practices, strengthen technical capabilities, and reinforce a customer first approach across every service interaction.

Our Service Commitments

- First Connect** - Delivering prompt response and immediate customer assistance.
- First-Time Resolution (FTR)** - Resolving issues efficiently to minimise downtime.
- Technical Excellence** - Continuously enhancing skills to support evolving customer needs.
- Root Cause Analysis (RCA)** - Addressing the source of problems for sustainable, long-term reliability.
- Preventive Maintenance** - Helping customers maximise machine uptime and productivity.
- SLA Excellence** - Delivering responsive, consistent, and accountable service every time.

Best Performing Branch
Delhi Branch (including Punjab)

1st Connect Champion

1 Pune Branch

2 Hyderabad Branch

3 Chennai Branch

System Adherence Champion

Mr. Sanjay Kumar (Delhi Team)

Mr. Vignesh V (Chennai Team)

Mr. Kiran G (Bangalore Team)

Best Suggestion on Product Quality Enhancement / Improvement

1st Rajkot Team

2nd Bangalore Team

3rd Delhi Team

Recognizing Excellence

Celebrating Achievements, Inspiring Growth.

Best Emerging Branch **Bangalore**

Highest AMC Business Achiever
Mr. Naveen Khatri (Delhi)

PM Completion Champion
**Mr. Mahendra Pal
& Installation team (Delhi)**

Best Application Support Champion
Mr. Pratik Garad (Mumbai)

Best Database Management Champion
Ms. Bindal Dholariya (Rajkot)

INDUSTRY CONNECT

Faculty Development Program with CII

In association with the CII Central Gujarat Zone, Cosmos Impex hosted a Faculty Development Program that brought together educators from various institutions to experience industrial practices firsthand. Through expert-led sessions, shopfloor interactions, and a guided plant tour, participants gained valuable insights into evolving manufacturing trends and future skill requirements.

"Industry-academia collaboration is

GROWING A GREENER FUTURE

Plantation Drive at Precipark:

As part of its commitment to environmental sustainability, Cosmos Engitech organised a plantation drive at Precipark, to contribute towards a greener tomorrow. The initiative reflected the collective responsibility of preserving nature and reaffirmed the belief that meaningful change begins with conscious action.

*"A sustainable future grows from
the actions we take today."*

Industrial Visit VTC Goraj Students

Cosmos Engitech hosted students from the Vocational Training Centre (VTC), Goraj. The visit provided hands-on exposure to manufacturing operations, quality practices, and workplace safety, offering valuable insights into the realities of the modern industrial environment.

India at 80: Engineering the Next Chapter

As India marks its 80th year of independence, we reflect on far more than a milestone in history, we celebrate a remarkable journey of progress.

From laying the foundations of industrial growth to emerging as one of the world's fastest-growing economies, India's story has been shaped by the collective aspirations, resilience, and determination of its people. Every generation has contributed towards building a nation that is stronger, more innovative, and increasingly recognised for its capabilities on the global stage.

Among the many forces driving this transformation, manufacturing has played a defining role.

Behind every aircraft component, every medical device, every automobile, every precision mould, and every engineered product lies an ecosystem of manufacturers, engineers, technicians, educators, suppliers, and entrepreneurs working together to create value. While their contributions often remain behind the scenes, they collectively strengthen India's industrial capabilities and reinforce its position in the global economy.

Today, Indian manufacturing stands at an exciting inflection point. Guided by national initiatives such as Make in India, Digital India, Skill India, and the vision of Atmanirbhar Bharat, the country is building more than industrial capacity. It is fostering innovation, embracing advanced technologies, nurturing skilled talent, and creating an ecosystem that is prepared to compete with the best in the world.

As we look ahead, the responsibility of industry extends beyond manufacturing products. It lies in developing capabilities, strengthening supply chains, encouraging innovation, investing in people, and creating sustainable value. Nation building is not defined by isolated achievements it is the outcome of countless organisations and individuals choosing to improve, innovate, and move forward together.

Every organisation has a role to play in shaping India's future. At Cosmos, we see ours in enabling manufacturing excellence. By empowering manufacturers with advanced CNC productivity solutions, we strive to help industries enhance precision, productivity, and global competitiveness. Through innovation, responsible growth, and meaningful partnerships, we remain committed to supporting the aspirations of Indian manufacturing and contributing to a future that is technologically advanced, globally competitive, and built on excellence.

The next chapter of India's journey will be defined by our ability to innovate, collaborate, and create value for the world. It will be shaped by every engineer who solves a challenge, every technician who pursues excellence, every entrepreneur who dares to build, and every manufacturer committed to raising global benchmarks.

As India moves forward, so do we, committed to enabling progress, strengthening manufacturing, and engineering the next chapter together.

PEOPLE-FIRST CULTURE

Recognised for Cultivating Employee Well-being

CIPL participated in the Confederation of Indian Industry's competition on holistic employee support systems, showcasing its commitment to employee well-being and people-centric practices. Adding to this achievement, the HR team secured the First Runner-Up position, reflecting the collective efforts of everyone who contributes to building a workplace rooted in care, trust, and continuous growth.

CII WELL-BEING COMPETITION

"A strong culture is built when people feel supported, valued, and empowered."

A New Space For Connections

A new Meeting room facility at **Tech Park 1**, was inaugurated by **Mr. Takeda** accompanied by Mitsubishi team. The room adds a welcoming setting for collaboration and exchange.

The occasion also marked another milestone in our long-standing association with Mitsubishi—a relationship built on trust, collaboration, and shared progress.

"Good partnerships grow through conversations, collaboration, and trust."

MARKET PRESENCE

TAGMA Die & Mould 2026 MUMBAI

At one of India's leading die and mould industry platforms, Cosmos engaged with customers and industry leaders while showcasing its capabilities in precision tooling and mould manufacturing.

"Every industry platform is an opportunity to connect, engage, and move forward together."

Kolkata Machine Tools Show 2026 KOLKATA

With Eastern India emerging as a key manufacturing hub, the event provided an opportunity to strengthen customer relationships and expand Cosmos' presence in the region.

INTEC 2026 COIMBATORE

Cosmos showcased its latest solutions and strengthened customer engagement at INTEC 2026, where the team was recognised with the prestigious Best Stall Award.

TEXPO 2026 CHENNAI

A VISIT THAT MADE THE OCCASION SPECIAL

Cosmos was honoured to welcome Hon'ble Minister Mr. Thennarasu and Ms. Sneha, IAS, District Collector, to our booth at TEXPO 2026.

Their visit and appreciation of our technology made the exhibition a particularly meaningful platform for Cosmos. Cosmos was the only machine tool manufacturer to participate in the exhibition, highlighting the growing importance of innovation, advanced manufacturing, and industry-government collaboration in strengthening India's manufacturing ecosystem.

AMTEX 2026 NEW DELHI

At AMTEX 2026, Cosmos brought its CNC machining solutions to the heart of India's manufacturing community, strengthening its presence and opening doors to new customer conversations and industry connections.

BUILDING CONNECTIONS, CREATING IMPACT

Strengthening our association with the **Jain International Trade Organisation (JITO), Vadodara Chapter**, Cosmos came on board as the **Title Sponsor** for a grand business gathering that brought together more than **700 participants** from Vadodara, Ahmedabad, Surat, and neighbouring cities.

The event brought together business leaders and professionals from diverse industries for an engaging session with renowned motivational speaker **Sonu Sharma**, who shared practical business mantras and perspectives on strengthening and growing businesses.

For Cosmos, it was more than an event it was a meaningful occasion to collaborate, connect with the business community, and share a platform built around learning, growth, and collective progress.

“When businesses come together, conversations become opportunities and connections become possibilities.”

Cosmos × JITO Vadodara

Risk, Responsibility & the Right Time to Leap - The Cosmos Way

Fact is, a majority of us Indians whether entrepreneurs, founders or professionals think very differently about risk compared to how it is often discussed or celebrated. It's not that we are afraid of it. We just don't romanticize it.

On social media, risk often sounds glamorous. Go all in. Take the leap. Do it now or stay stuck. But on the ground, we know life looks very different. For many of us, there is a lot riding on our choices.

Parents back home who have put their life's savings into our education. Families that depend on a monthly income. Loans. EMIs. Responsibilities that don't pause while you figure things out.

When you come from a simple background, risk is not theoretical. It is personal. So decisions tend to be measured. Thought through. Taken with a clear understanding of what can be stretched and what cannot be lost.

I've seen people work incredibly hard, take smart chances, and still choose not to take big risks with their careers. Not because they lack ambition, but because failure doesn't affect only them.

This applies just as much to a professional deciding whether to quit a stable job as it does to a founder deciding how fast to scale a company. "All or nothing" sounds exciting in interviews with people who made it. In real life, it can cost far more than it appears.

Your appetite for risk is deeply tied to your circumstances. What I respect about this mindset is the strength it builds.

When you build with responsibility, you are forced to think long term. You pace yourself. You learn to survive slow months, bad phases and unexpected turns. That doesn't make you cautious. **It makes you prepared.**

At Cosmos, our early years were very much about sticking to the basics and playing it safe not because we lacked ambition, but because we needed to establish ourselves.

We focused on products we understood and represented brands that had already made a mark on the global platform. Cutting tools. Machine tools. Mainly Taiwanese brands. It was familiar territory, and that mattered.

We needed to secure our place, stay relevant, keep the business moving and, most importantly, generate consistent sales.

Only later, when we were in a stronger and safer position, did we start taking bigger risks. **We stepped into manufacturing, starting with surface grinders and then moving into VMCs and other products.**

We were convinced these risks would pay off. But the fact was, we simply couldn't afford to take them earlier.

And there is an important lesson in that. If you're in a phase where you can't take big leaps, it doesn't mean your options are limited. It simply means your path will unfold differently.

Everyone's journey is unique. There is no single correct timeline. The goal is not to win fast. **The goal is to stay in the game long enough to win well.**

Risk, when taken with awareness, doesn't shrink your dreams. It gives them the space to grow at the right time.

Today, at Cosmos, we have built a very different appetite for risk. **We appreciate new ideas, new creativity and the courage to explore what hasn't been done before.**

We are ready to think about scaling up, building new factories, investing heavily in research and development, and developing new products that are emerging with remarkable speed.

We have reached a stage where we can take risks not because circumstances no longer matter, but because we have built the foundation to absorb those risks & perhaps that is the real meaning of having a **high risk appetite**. It is not about jumping at every opportunity. It is about having the experience, resources, confidence and resilience to know which risks are worth taking and when.

Working at Cosmos always gives us the direction and opportunity to fulfil our personal and professional dreams. More importantly, it prepares us to face the future with greater confidence, greater capability and a stronger appetite for the right risks.

Because sometimes, the bravest decision is not taking the leap. **It is knowing when you are ready to take it.**
